

ZAMIR JAMALOV

IT Business Analyst | Risk Modeling & Scoring

+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with 2+ years in fintech, specializing in **credit scoring, antifraud systems, risk assessment, and decision engine** change requests. Engineering background (15+ years) enables precise translation of complex risk rules into technical specifications for development teams. Delivered production scoring and credit lifecycle systems, bridging business, risk, and IT.

CORE SKILLS

Risk & Scoring: Credit Scoring Models | Decision Engine & Rule Engine | Antifraud Systems | Risk Assessment | Scorecards | Cut-off Matrices | DTI / Residual Income | IFRS 9 Classification

BA Documentation: BRD / FRD / SRS | User Stories (Gherkin) | BPMN (As-Is / To-Be) | UML | Use Cases | Process Flow | Change Requests | API Specification (Swagger/OpenAPI 3.0)

Languages: Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical)

Technical: SQL (Advanced - Data Analysis & Validation) | REST API & JSON | Postman | Database Concepts (Oracle, PostgreSQL, MongoDB) | BPM/JPBM Workflow | Data Mapping

Tools & Methods: Jira | Confluence | Agile/Scrum | UAT Planning & Bug Triage | RICE Prioritization | L2 Production Support (ELK Stack)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst

2025 - Present

Risk Modeling & Scoring Squad - Credit Scoring, Antifraud, Risk Assessment, Decision Engine

Credit Scoring Systems:

- Designed hybrid scoring algorithms integrating ASAN Finans and AKB data for customer risk scoring; formulated DTI and Residual Income validation rules with auto-reject logic (code 005)
- Architected Scorecard matrices (0-149: Auto Reject, 150-750: Manual Review, >750: Auto Approve) and defined complex scoring variables (Monthly Delay Ratio, Max Overdue Days) for Clojure scripts

Antifraud Systems:

- Designed SIMA KYC biometric verification integration with async validation and auto-block scenarios (error codes 1001, 1003)
- Implemented Sanction Scanner and Blacklist checking with auto-reject logic (code 180) and dynamic cooling-off rules (15/90 day blocks) for repeat fraudulent applications

Risk Assessment:

- Formulated pre/post-disbursement risk rules including age limit bypass, PAR/IFRS 9 classification logic (Stage 1/2/3), and collateral LTV ratio calculations for credit limit management

Decision Engine & Workflow:

- Systematized 7-level priority cut-off rules (R_1020 to R_5030) for straight-through processing with auto-cancel triggers; designed smart routing algorithms for auto-assignment to Loan Officers based on amount/risk
- Designed refinancing (close-open) scenarios with auto-deduction waterfall (principal + interest + penalty) and BPM/JPBM lifecycle transitions (S001-S006)

Delivery & Coordination:

- Authored BRD/FRD/SRS with REQ-101 traceability; prepared Swagger API specs and data mapping documents for developer handoff; coordinated UAT with bug triage
- Used SQL data analysis to resolve stakeholder conflicts (risk vs. sales); applied RICE framework for backlog prioritization

Birbonus | IT Business Analyst

2024 - 2025

- Designed customer loyalty bonus system with earning rules, eligibility criteria, and partner settlement workflows; authored BRD and API integration specs

Umico | PostgreSQL Developer & L2 Support

2022 - 2024

- Built backend features using PostgreSQL; resolved L2 production incidents via ELK Stack log analysis; supported partner teams with API integration onboarding

TECHNICAL FOUNDATION

15+ years in software engineering (Central Bank of Azerbaijan, Unibank, ASAN Service) - C# backend, databases (Oracle, MSSQL, PostgreSQL, MongoDB), system integration, CI/CD pipelines. Enables precise requirement-to-code translation and rapid root cause analysis. Deep understanding of banking core systems, credit lifecycle, and regulatory compliance.

EDUCATION

Baku State University - Bachelor of Science in Applied Mathematics
