

ZAMIR JAMALOV

IT Business Analyst | Risk Modeling & Scoring
+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with 2+ years in fintech, specializing in **credit scoring, decision engine rule design, and risk assessment** change requests. Authored 25+ cut-off rules across a 6-priority tiered decision framework for straight-through processing. 15+ years of software engineering background enables precise translation of complex risk logic into developer-ready specifications.

CORE SKILLS

Risk & Scoring: Credit Scoring | Decision Engine / Rule Engine | Cut-off Rule Design (Auto-Reject / Auto-Approve / Expert Routing) | Scorecard Matrices | DTI Analysis | Risk Variables (Delay Ratio, Credit History Depth) | Stop-Factor vs Soft-Factor Logic | Cooling-off Periods | Exception Handling | IFRS 9 Awareness

Technical: SQL (Advanced Data Analysis) | REST API & JSON | Swagger/OpenAPI 3.0 | Postman | Database Concepts (Oracle, PostgreSQL, MongoDB) | BPMN Process Modeling | Data Mapping | Sequence Diagrams

BA Toolkit: BRD / FRD / SRS (REQ-101 Traceability) | User Stories (Gherkin Acceptance Criteria) | Change Requests | UAT Planning & Bug Triage | RICE Prioritization | Jira | Confluence | Agile/Scrum

Languages: Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical Documentation)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst

2025 - Present

Risk Modeling / Scoring Squad - Cash Loan (RCASH) Decision Engine

Decision Engine - Cut-off Rule Design:

- Authored **25+ cut-off rules** (R_1010 to R_6040) organized in a **6-priority tiered framework**: Loan Workbench (blacklist, credit history) > ASAN Finans (personal data, age limits) > AKB Skor Servisi (stop-factors, scoring balance) > AKB Credit History (delinquency, active loan limits) > Workplace/Pension validation > Combined rules with exception logic
- Designed three-way routing: **Auto-Reject** (hard stop-factors with cooling-off periods), **Auto-Approve** (high-score customers, straight-through processing), and **Expert Review** (borderline cases routed to Loan Officer with decision window)
- Defined **stop-factors** (blacklist, active delinquency, expired contracts) vs **soft-factors** (thin credit file, new-to-credit, minor delinquency) triggering manual review

Credit Scoring & Risk Variables:

- Configured **scoring matrices** by integrating data from multiple external services (ASAN Finans personal data, SIMA personal information, AKB score, AKB credit history); analyzed score distributions over time and reconfigured weight parameters to optimize approval/rejection balance
- Developed **hybrid scoring model** combining external AKB credit bureau score with company-internal risk score; formulated personalized credit decision logic tailored to individual applicant risk profiles
- Performed quantitative analysis on **AKB credit history** data: calendar-based payment regularity tracking, loan amount distribution analysis, and credit card utilization patterns computed using **natural logarithm-based normalization** methods
- Defined cooling-off rules: repeat application blocks after rejection (3/15/90 days by rejection type) and exception logic for customers with positive Embafinans history

Risk Assessment & Delivery:

- Authored BRD/FRD/SRS with REQ-101 traceability; prepared Swagger API specs and data mapping documents for developer handoff; coordinated UAT with structured bug triage (Critical/Major/Minor)
- Used SQL data analysis to resolve stakeholder conflicts (risk vs. sales); applied RICE framework for backlog prioritization; achieved on-time delivery across 4 production projects

Birbonus | IT Business Analyst

2024 - 2025

- Designed customer loyalty bonus system with earning rules, eligibility criteria, and partner settlement workflows; authored BRD and API specs

Umico | PostgreSQL Developer & L2 Support

2022 - 2024

- PostgreSQL backend development; L2 production incident resolution via ELK Stack log analysis; API integration onboarding support

TECHNICAL FOUNDATION

15+ years in software engineering (Central Bank of Azerbaijan, Unibank, ASAN Service) - C# backend, databases (Oracle, MSSQL, PostgreSQL, MongoDB), system integration, CI/CD pipelines. Enables precise requirement-to-code translation and deep understanding of banking core systems, credit lifecycle, and regulatory compliance (Central Bank requirements).

EDUCATION

Baku State University - Bachelor of Science in Applied Mathematics
