

ZAMIR JAMALOV

IT Project Manager

+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan | LinkedIn: linkedin.com/in/zamir-jamalov

PROFILE SUMMARY

Results-driven IT Project Manager with 2+ years of hands-on project delivery experience across fintech and e-commerce domains. Proven track record of managing cross-functional teams through full project lifecycles -- from requirements gathering and process modeling to UAT coordination and production go-live. Successfully delivered multiple production systems including credit scoring platforms, payment gateway integrations, and real-time monitoring dashboards. Engineering background of 15+ years enables effective technical oversight, precise scope definition, and rapid issue resolution. Skilled in Agile/Scrum methodologies, stakeholder management, risk mitigation, and data-driven decision making using SQL and Power BI. Seeking to leverage project management expertise to drive measurable business outcomes.

CORE COMPETENCIES

Project Management

Project Planning & Scheduling | Risk & Issue Management | Stakeholder Management | Change Management | Resource & Budget Allocation | Scope Definition & Control

Business Analysis

BRD / FRD / SRS | User Stories & Acceptance Criteria (Gherkin) | BPMN (As-Is / To-Be) | Gap Analysis | Stakeholder Interviews

Methodologies & Tools

Agile / Scrum | Waterfall | Jira | Confluence | Power BI | RICE Prioritization | UAT Planning & Coordination

Technical Skills

SQL (Advanced Queries) | REST API & JSON | Swagger / OpenAPI 3.0 | Postman | L2 Production Support (ELK Stack)

Languages Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical Documentation)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst (Project Delivery & Coordination)

2025 - Present | Fintech | Baku, Azerbaijan

Projects Delivered as Project Lead:

- BNPL Credit Scoring & Pre-Screen Risk Assessment -- Led end-to-end delivery of automated multi-factor credit decisioning system, achieving 2x faster credit decisions
- B2C Sales Channel & Payment Gateway Integration -- Managed cross-functional delivery of online sales channel processing 300-500 daily applications with integrated payment processing
- Goods Loan Delivery Tracking Dashboard -- Coordinated development of real-time monitoring dashboard with digital e-signature, reducing tracking errors by 50%
- End-to-End Credit Lifecycle Platform -- Oversaw full lifecycle delivery spanning application, disbursement, and collection modules across cross-functional teams

Project Management & Delivery Approach:

- Scope Definition & Planning: Conducted structured stakeholder sessions with risk, sales, and operations teams to define project scope, map As-Is workflows, and design To-Be BPMN process models for clear project roadmapping
- Requirements & Documentation Management: Authored comprehensive BRDs, FRDs, and SRS documents with REQ-101 numbered requirements; maintained full traceability matrix across sprints to ensure scope control
- Technical Coordination: Defined REST API specifications in Swagger/OpenAPI 3.0, created sequence diagrams for integration flows, and prepared data mapping documents for seamless developer handoff
- Stakeholder & Communication Management: Facilitated stakeholder alignment meetings, managed expectations across business and technical teams, and delivered regular status reports and progress updates
- Quality Assurance & UAT Coordination: Coordinated UAT execution with business stakeholders, led bug triage meetings with QA and development teams, and achieved on-time sign-off across multiple release cycles
- Risk & Issue Management: Proactively identified project risks and dependencies, implemented mitigation strategies, and leveraged SQL data analysis to resolve conflicting stakeholder priorities with evidence-based recommendations
- Backlog & Resource Prioritization: Ranked requirements and user stories using RICE framework to align sprint planning with business value and optimize resource allocation

Birbonus | IT Business Analyst (Project Delivery)

2024 - 2025 | E-Commerce / Fintech | Baku, Azerbaijan

- Led the design and delivery of a customer loyalty bonus system enabling shoppers to earn rewards and redeem across partner merchants
- Conducted stakeholder sessions to define earning rules, eligibility criteria, and partner settlement workflows, managing project scope from concept to delivery

Umico | PostgreSQL Developer & L2 Support

2022 - 2024 | E-Commerce | Baku, Azerbaijan

- Built backend features using PostgreSQL and resolved L2 production incidents using ELK Stack log analysis and source code investigation
- Supported partner development teams with API integration onboarding, demonstrating cross-team coordination and technical troubleshooting skills

TECHNICAL FOUNDATION

15+ years in software engineering (Central Bank of Azerbaijan, Unibank, ASAN Service) -- C# backend development, relational databases (Oracle, MSSQL, PostgreSQL) and NoSQL (MongoDB), system integration, Git, and CI/CD pipelines. This deep technical background enables effective
