

ZAMIR JAMALOV

IT Business Analyst | Risk Modeling & Scoring
+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with 2+ years in fintech, specializing in credit scoring, decision engine rule design, and risk assessment. Engineering background enables precise translation of risk logic into developer-ready specs. Proficient in Python-based data analytics (descriptive/diagnostic analysis, hypothesis testing, regression). Having designed 25+ cut-off rules across a 6-priority decision framework, looking to drive measurable risk optimization outcomes.

CORE SKILLS

Risk & Scoring:

Credit Scoring | Decision Engine / Rule Engine | Cut-off Rule Design (Auto-Reject / Auto-Approve / Expert Routing) | Scorecard Matrices | Hybrid Scoring Models | Risk Variables | Stop-Factor vs Soft-Factor | Cooling-off Periods

Technical:

SQL (Advanced Data Analysis) | Python (Data Analytics, pandas, NumPy) | REST API & JSON | Swagger / OpenAPI 3.0 | Postman | SOAP / XML | Databases (Oracle, PostgreSQL, MongoDB)

Data Analytics: Descriptive & Diagnostic Analysis | Hypothesis Testing | Regression Modeling | Statistical Analysis (Python)

Business Analysis:

BRD / FRD / SRS | User Stories & Acceptance Criteria (Gherkin) | BPMN (As-Is / To-Be) | UML | Sequence Diagrams | Data Mapping | Gap Analysis | Use Case | Stakeholder Interviews | RICE Prioritization

Process & Tools:

Agile / Scrum | Jira | Confluence | UAT Planning & Coordination | Change Requests | Bug Triage (Critical / Major / Minor)

Languages: Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical Documentation)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst

2025 - Present

Decision Engine - Cut-off Rule Design

- Designed 25+ cut-off rules in a 6-priority tiered framework: ASAN Personal Info (personal data, age limits) > ASAN Finance (workplace) > AKB Score (score data, stop-factors) > AKB History (credit records, overdue days) > ASAN Pension Info (pension data) > Combined rules
- Designed three-way routing: Auto-Reject (hard stop-factors), Auto-Approve (high-score), and Expert Review (borderline cases routed to Loan Officer)

Credit Scoring & Risk Variables

- Configured scoring matrices integrating data from ASAN Personal Info, ASAN Finance, ASAN Pension Info, SIMA, AKB Score, and AKB History; analyzed score distributions to optimize approval/rejection balance
- Developed hybrid scoring model combining external AKB bureau score with company-internal risk score; formulated personalized credit decision logic for individual applicant profiles
- Performed quantitative analysis on AKB History: payment regularity, loan amount distribution, and credit card utilization computed using natural logarithm-based normalization

Risk Assessment & Model Optimization

- Monitored scoring model performance and optimized cut-off thresholds with risk team; analyzed score distributions and approval/rejection ratios to recalibrate decision boundaries
- Controlled data quality of scoring inputs (ASAN services, AKB bureau, SIMA); identified anomalies and coordinated with IT to resolve integration issues
- Defined antifraud detection rules within decision engine; structured risk indicators for pre-disbursement screening based on behavioral and historical patterns

Delivery & Coordination

- Designed BRD/FRD/SRS with end-to-end requirements traceability; prepared Swagger API specs; coordinated UAT with bug triage; applied RICE framework for backlog prioritization

Birbonus | IT Business Analyst

2024 - 2025

- Designed a customer loyalty bonus system with earning rules, eligibility criteria, and partner settlement workflows; prepared BRD and API specs

Umico | PostgreSQL Developer & L2 Support

2022 - 2024

- PostgreSQL backend development; L2 production incident resolution via ELK Stack log analysis; API integration onboarding support for partner teams

TECHNICAL FOUNDATION

As PL/SQL backend developer, participated in a core banking system built from scratch, developing key modules including general ledger / chart of accounts, accounting transactions, currency exchange, and credit lifecycle. 15+ years across Central Bank of Azerbaijan, Unibank, and ASAN Service covering C# backend, Oracle / MSSQL / PostgreSQL / MongoDB, system integration, and CI/CD pipelines.

TRAINING & EDUCATION

Innab Training Center | Corporate Data Analytics Trainer

Delivered corporate Python data analytics training for Bank of Baku and SOCAR Upstream, adapting content to each organization's real datasets. Focus on descriptive and diagnostic analysis to uncover patterns, trends, and root causes in operational data.

Baku State University - Bachelor of Science in Applied Mathematics
