

ZAMIR JAMALOV

IT Business Analyst | Risk Modeling & Scoring

+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with 2+ years in fintech, specializing in credit scoring, decision engine rule design, and risk assessment change requests. Engineering background enables precise translation of complex risk logic into developer-ready specifications. Proficient in Python-based data analytics including descriptive and diagnostic analysis, hypothesis testing, and regression modeling. Having authored 25+ cut-off rules across a 6-priority tiered decision framework, looking to apply the same analytical approach to drive measurable risk optimization outcomes.

CORE SKILLS

Risk & Scoring:

Credit Scoring | Decision Engine / Rule Engine | Cut-off Rule Design (Auto-Reject / Auto-Approve / Expert Routing) | Scorecard Matrices | Hybrid Scoring Models | Risk Variables | Stop-Factor vs Soft-Factor | Cooling-off Periods | IFRS 9 Awareness

Technical:

SQL (Advanced Data Analysis) | Python (Data Analytics, pandas, NumPy) | REST API & JSON | Swagger / OpenAPI 3.0 | Postman | Databases (Oracle, PostgreSQL, MongoDB)

Data Analytics: Descriptive & Diagnostic Analysis | Hypothesis Testing | Regression Modeling | Statistical Analysis (Python)

Business Analysis:

BRD / FRD / SRS (REQ-101 Traceability) | User Stories & Acceptance Criteria (Gherkin) | BPMN (As-Is / To-Be) | UML | Sequence Diagrams | Data Mapping | Gap Analysis | Stakeholder Interviews | RICE Prioritization

Process & Tools:

Agile / Scrum | Jira | Confluence | UAT Planning & Coordination | Change Requests | Bug Triage (Critical / Major / Minor)

Languages: Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical Documentation)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst

2025 - Present

Decision Engine - Cut-off Rule Design

- Authored 25+ cut-off rules (R_1010 to R_6040) organized in a 6-priority tiered framework: Loan Workbench > ASAN Finans (personal data, age limits) > AKB Skor Servisi (stop-factors, scoring balance) > AKB Credit History (delinquency, active loan limits) > Workplace/Pension validation > Combined rules with exception logic
- Designed three-way routing: Auto-Reject (hard stop-factors with cooling-off periods), Auto-Approve (high-score customers, straight-through processing), and Expert Review (borderline cases routed to Loan Officer with decision window)

Credit Scoring & Risk Variables

- Configured scoring matrices integrating data from ASAN Finans, SIMA, AKB score, and AKB credit history; analyzed score distributions over time and reconfigured weight parameters to optimize approval/rejection balance
- Developed hybrid scoring model combining external AKB bureau score with company-internal risk score; formulated personalized credit decision logic tailored to individual applicant risk profiles
- Performed quantitative analysis on AKB credit history: calendar-based payment regularity, loan amount distribution, and credit card utilization computed using natural logarithm-based normalization
- Defined cooling-off rules (3/15/90-day blocks) and exception logic for repeat applicants

Risk Assessment & Delivery

- Authored BRD/FRD/SRS with REQ-101 traceability; prepared Swagger API specs and data mapping documents for developer handoff; coordinated UAT with structured bug triage (Critical/Major/Minor)
- Used SQL data analysis to resolve stakeholder conflicts (risk vs. sales); applied RICE framework for backlog prioritization; achieved on-time delivery across 4 production projects

Birbonus | IT Business Analyst

2024 - 2025

- Designed a customer loyalty bonus system enabling shoppers to earn rewards on purchases and redeem across participating partner merchants, conducting stakeholder sessions to define earning rules, eligibility criteria, and partner settlement workflows

Umico | PostgreSQL Developer & L2 Support

2022 - 2024

- Built backend features using PostgreSQL, resolved L2 production incidents using ELK Stack log analysis and source code investigation, and supported partner development teams with API integration onboarding

TECHNICAL FOUNDATION

15+ years in software engineering (Central Bank of Azerbaijan, Unibank, ASAN Service). As PL/SQL backend developer, participated in a core banking system built from scratch, developing key modules including chart of accounts (hesabatları planı), accounting transactions (muhasibat ugurlamalari), currency exchange (valyuta mubadilesi), and credit lifecycle module. C# backend development, relational databases (Oracle, MSSQL, PostgreSQL) and NoSQL (MongoDB), system integration, Git, and CI/CD pipelines. Enables precise requirement-to-code translation and deep understanding of banking core systems.

EDUCATION & CERTIFICATIONS

Baku State University - Bachelor of Science in Applied Mathematics

Innab Training Center - Data Analytics with Python: Descriptive & diagnostic analysis, hypothesis testing, regression modeling, and statistical inference using Python (pandas, NumPy, scikit-learn)
