

ZAMIR JAMALOV

IT Business Analyst | Risk Modeling & Scoring

+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with 2+ years in fintech credit scoring and real-time decision engine implementation. Led end-to-end scoring system setup from strategy definition through go-live and PSI-based monitoring for a custom-built lending platform — working closely with Risk, Compliance, IT, and QA teams. Engineering background enables precise translation of risk logic into developer-ready specifications.

CORE SKILLS

Risk & Scoring:

Credit Scoring | Real-Time Decision Engine | Multi-Stage Cut-off Design | Scorecard Matrices | Additive Point-Based Scorecard | PSI Monitoring | Score Distribution Analysis | Champion-Challenger Testing | Decision Audit Trail | Antifraud Rules

Technical:

SQL (Advanced Analysis) | Python (pandas, NumPy, regression) | REST API & JSON | Swagger / OpenAPI 3.0 | SOAP / XML | Oracle / PostgreSQL

Business Analysis:

BRD / FRD / SRS | User Stories (Gherkin) | BPMN (As-Is / To-Be) | Data Mapping | Gap Analysis | Use Case | RICE Prioritization

Languages:

Azerbaijani (Native) | Russian (Fluent) | English (Professional / Technical Docs)

PROFESSIONAL EXPERIENCE

Embafinans | IT Business Analyst

2025 - Present

- Led scoring strategy definition with Risk & Compliance teams — conducted stakeholder interviews, analyzed as-is credit process, defined 6 data source requirements (ASAN, AKB, SIMA), multi-stage decision logic, segment boundaries, and cut-off acceptance criteria
- Designed 6-stage real-time decision engine with IT team — stage-specific cut-off thresholds (local checks → ASAN Personal Info → AKB Score → AKB History → ASAN Finance → Pension Info); three-way routing (auto-approve / auto-reject / expert review) with full decision audit trail
- Built additive point-based scorecard with Risk Team — mapped AKB attributes (9-month payment trend, overdue days, credit card utilization, loan amount) to calibrated point adjustments overlaid on bureau base score to derive internal risk score; natural logarithm normalization for distributions
- Coordinated UAT with QA & Risk through go-live — champion-challenger cut-off validation against production baseline, test scenario design, acceptance criteria definition, and bug triage
- Established PSI-based model governance — monthly score distribution monitoring, cut-off efficiency analysis (actual vs. expected pass rates), rule versioning with rollback readiness, and data quality governance (missing-value policies, outlier thresholds) per input source
- Structured antifraud rules within decision engine: velocity checks for rapid repeat applications, cross-source data consistency validation, and behavioral pattern flags for identity verification; delivered BRD/FRD/SRS with Swagger API specs and end-to-end requirements traceability

Birbonus | IT Business Analyst

2024 - 2025

- Designed a customer loyalty bonus system — defined earning rules, spend eligibility criteria, partner settlement workflows, and API integration specs; prepared BRD

Umico | PostgreSQL Developer & L2 Support

2022 - 2024

- PostgreSQL backend development; L2 production incident resolution via ELK Stack log analysis; API integration onboarding and troubleshooting for partner teams

TECHNICAL FOUNDATION

PL/SQL backend developer; participated in core banking system development including general ledger, chart of accounts, accounting transactions, and credit lifecycle modules. 15+ years across Central Bank of Azerbaijan, Unibank, and ASAN Service covering C# backend, Oracle / PostgreSQL / MongoDB, system integration, and CI/CD pipelines.

TRAINING & EDUCATION

Innab Training Center | Corporate Data Analytics Trainer

Delivered corporate Python data analytics training for Bank of Baku and SOCAR Upstream — adapted content to each organization's real datasets; focus on descriptive/diagnostic analysis, hypothesis testing, and regression modeling.

Baku State University - BS in Applied Mathematics
