

ZAMIR JAMALOV

Business Analyst | Government Service Design & Multi-Agency Coordination

+994 55 207 7228 | jamalov.zamir@gmail.com | Baku, Azerbaijan

PROFILE SUMMARY

Business Analyst with direct experience in government service consolidation: coordinated 10+ agencies into the single-window Government Payment Portal at the Central Bank and led end-to-end service design for the Labour Market Analysis System at the State Employment Agency. Recently strengthened with fintech experience in API design (Swagger/OpenAPI 3.0), Agile delivery, and production-grade documentation (BRD, FRD, SRS, ToR, SDD). Strong background in ensuring alignment between process architecture and institutional requirements across government organizations.

CORE SKILLS

Service Design & Analysis:

Applied Service Design | Service Journey Analysis | Citizen-Centered Service Design | Multi-Agency Service Coordination | As-Is / To-Be Service Analysis | SLA / KPI Monitoring | Process Digitization

Business Analysis:

BRD / FRD / SRS | User Stories & Acceptance Criteria | BPMN (As-Is / To-Be) | UML & Sequence Diagrams | Gap Analysis | Stakeholder Interviews | Backlog Prioritization (RICE) | UAT

Technical:

REST API & JSON | Swagger / OpenAPI 3.0 | SQL & Data Modeling | SDLC | System Architecture & Integration | Data-Driven Analysis | Microservice Principles

Process & Tools:

Agile / Scrum | Jira | Confluence | Cross-Functional Coordination | Government Stakeholder Management

PROFESSIONAL EXPERIENCE

Embafinans | Lead IT Business Analyst

2025 - Present

Leading business analysis for fintech products including BNPL credit scoring, payment gateway integration, and loan tracking dashboard. Authoring BRD, FRD and SRS documents; writing User Stories with Gherkin Acceptance Criteria and maintaining traceability across sprints. Defining REST API specifications in Swagger / OpenAPI 3.0 and coordinating UAT execution with business stakeholders.

Kapital Bank / Birbonus | IT Business Analyst

2024 - 2025

Designed a customer loyalty bonus system enabling shoppers to earn rewards on purchases and redeem across partner merchants. Conducted stakeholder sessions to define earning rules, eligibility criteria, and partner settlement workflows.

Umico | Integration Specialist

2022 - 2024

Managed API integration of 25+ partner companies into the Umico ecosystem, defining integration specifications and coordinating technical implementation. Developed backend features using PostgreSQL, resolved L2 production incidents, and supported partner development teams.

State Employment Agency | Innovation Section Lead & Business Analyst

2021 - 2022

Led the digitization of the Labour and Employment Subsystem (LMAS): analyzed the full citizen life-event service journey from application to result, defined the methodology and end-to-end process architecture, and authored requirements documentation; ensured alignment of new service design with existing service portfolio and institutional structures. Designed a citizen service channel using Telegram bot for real-time application submission, reducing physical office visits and improving accessibility. Built a real-time monitoring dashboard tracking citizen applications, response times (SLA), and service quality indicators (KPI). Coordinated a 15-member cross-functional project team and managed multi-stakeholder communication across government departments.

Applied life-event based design approach: organized services around the citizen unemployment journey rather than agency structure, ensuring cross-agency service alignment

Central Bank of Azerbaijan | Integration Specialist

2007 - 2012

Coordinated the integration of 10+ government organizations into the single-window Government Payment Portal (GPP): defined data exchange requirements and integration specifications for each agency

Designed the process architecture and interoperability layer for cross-system data exchange between government institutions, enabling automated payment processing at national scale

Established standardized data exchange specifications and integration standards across agencies with different technical maturity levels

PROFESSIONAL DEVELOPMENT

Acquired business analysis methodology through practical application across fintech, e-commerce and government digitization projects. Produced BA documentation including BRD, FRD, SRS, User Stories, API Specifications, BPMN process models and UAT plans in real production environments.

ADDITIONAL PROFESSIONAL BACKGROUND

Enterprise system design and implementation experience (2013-2021) across Azerbaijan's banking and public sectors: core banking system architecture and support at Zaminbank; mobile banking system design and development (UMobileBank) at Unibank; banking system modernization at Bank of Baku and Rabita Bank; e-commerce platform backend at Umico; and public service data analytics at ASAN Service, including experience with registry-based data exchange across government agencies. This period built deep understanding of how complex enterprise systems are designed, integrated and maintained at scale.

EDUCATION

Baku State University - Bachelor of Science in Applied Mathematics

LANGUAGES

Azerbaijani (Native) | Russian (Fluent) | English (Professional Working Proficiency)
